

We Are FEEDING® FLORIDA

9 FOOD BANKS
67 COUNTIES

Feeding Florida's network of **9 food banks** works with more than **2,400 partner charitable agencies** - local churches, non-profits, schools, and health centers with food pantries- to deliver programs, services, and meals directly to **2.9 million hungry Floridians**. Our food banks provide **healthy, consistent and reliable food support** every day to **all 67 counties**.

Thanks to support from our partners, charitable networks, and the Florida Legislature, in fiscal year 2024-2025, our food banks distributed **over 437 million pounds of food** to families, individuals, children, seniors, and veterans. This included **over 48.6 million pounds of Florida-grown products (fruits, vegetables, and proteins)** this fiscal year through Farmers Feeding Florida.

We know that hunger is a symptom of an under-resourced home.

Many of our food banks and community-based partners also offer **job training** and resources to further help the people we serve find their footing. Our approach to addressing **food access** and **nutrition education** aims to work within the entire food system to build healthy, resilient communities.

**SUPPORTING EVERY
COMMUNITY EVERY DAY**

FEEDING FLORIDA PROGRAMS

Farmers Feeding Florida

Farmers Feeding Florida is Feeding Florida's product recovery and distribution program, working with local farmers and ranchers. The program has recovered over 347 million pounds of Florida-grown products, including produce, protein, and dairy, over the past 10 years. Supported by the Florida Legislature, the program strengthens the state's agriculture industry while helping ensure nutritious food reaches neighbors who need it most.

Fresh Access Bucks

Fresh Access Bucks is Feeding Florida's USDA-funded nutrition incentive program, designed to make fresh, Florida-grown produce more accessible and affordable for Floridians experiencing food insecurity. The program is available at farmers markets, produce stands, CSAs, mobile markets, and grocery stores across the state.

Florida Nutrition Ed

Florida Nutrition Ed helps individuals and families make healthy food choices while stretching their food budgets. Through Feeding Florida's network of food banks, nutrition education is offered in every county, connecting people to practical tools, resources, and support services that make it easier to put healthy food on the table.

Nourish Florida

Nourish Florida is Feeding Florida's statewide Food is Health program, connecting Floridians with chronic diseases with medically supportive food. Through our unified network of nine food banks, the program provides regular deliveries of healthy food boxes, along with nutrition education and support to help participants better manage their health.
